Cathedral Academy at Pompei

Summer 2017, 2018

Syracuse, NY

- Guided elementary students in learning English, math, and science
- Settled arguments and monitored student safety
- Solved technical difficulties

PROJECTS

Death Note | *React.js*

Jan 2023

- Built website that simulates the death note from the anime "Death Note"

Yearbook Website | *MongoDB, Express.js, Node.js, Jade, Bootstrap*

Jan 2023

- Created basic CRUD website allowing user to upload a picture, name, and description for each person

Skin Cancer Detector | *Flutter, Python*

Oct 2022

- Learned Dart and Flutter in 3 hours to implement a picture-taking Flutter app
- Collaborated with 3 teammates to build an app that can recognize skin cancer from a picture that the user took

Google Software Product Sprint | *HTML, CSS, JavaScript, Java, Git*

Summer 2022

- Created a portfolio website using Google APIs and Java Servlets
- Added transitions and styles and reviewed code for a collaborative project involving a web app that displayed essential college items

Bandcamp Web Scraper | *Python, Bash, Vim*

July 2022

- Wrote a guide on setting up browser automation on ChromeOS
- Optimized a Bandcamp web scraper with better and new functions

Castlevania Tribute | *Python*

June 2022

- Developed a game that displays quotes from Castlevania based on in-game collisions
- Implemented new text animations in the game

Fortune Cookie | *HTML, CSS, JavaScript*

June 2022

- Produced a virtual fortune cookie that cracks and provides a fortune
- Used Advice Slip JSON API to generate fortunes

TECHNICAL SKILLS AND ACTIVITIES

Languages: HTML, CSS, JavaScript, Python

Developer Tools: Git, VS Code

Activities: Hack4Impact, Google Software Product Sprint, Hackathons
